

NGO Impact Dashboard – User Guide

Purpose

This dashboard helps NGO staff monitor program performance, beneficiary reach, learning outcomes, and cost efficiency.

Filters

The dashboard includes the following filters:

- Gender
- District
- Program Name

Users can select one or multiple filters to analyze specific beneficiary groups.

KPI Cards

Total Students

Shows the total number of beneficiaries included in the analysis.

Total Cost

Shows the total expenditure incurred across selected programs.

Completion Rate

Percentage of beneficiaries who successfully completed the program.

Outcome Achievement Rate

Percentage of beneficiaries who achieved the desired learning outcome.

Average Improvement

Average percentage increase in assessment scores after program participation.

Cost Per Successful Student

Average cost incurred for each beneficiary who achieved the desired outcome.

Visualizations

Attendance vs Learning Improvement

Shows the relationship between attendance and learning gains.

Average Improvement by Program

Compares learning improvement across NGO programs.

Outcome Achievement Distribution

Displays the proportion of beneficiaries who achieved the target outcome.

Impact Framework

Illustrates how NGO activities lead to outputs, outcomes, and long-term impact.

Attendance Bin vs Outcome Achievement

This chart shows how outcome achievement varies across attendance groups.

Attendance categories:

- 25–50%
- 50–75%
- 75–100%

Identify whether attendance influences program success.

Help program managers focus on improving beneficiary participation.

Recommended Review Frequency

- Program Managers: Weekly
- Monitoring & Evaluation Team: Monthly
- Executive Director: Weekly

What is the one number the Executive Director should check every Monday?

Answer

Outcome Achievement Rate (%) because it:

- Measures actual program effectiveness.
- Goes beyond activity metrics such as attendance or enrollment.
- Indicates whether beneficiaries are achieving intended outcomes.

2. How do you handle data quality issues from field workers?

Answer

A data-cleaning pipeline was implemented before dashboard creation.

Steps:

Missing Values

- Missing Gender values replaced with mode.

- Missing District values replaced with mode.
- Missing Post-Test Scores replaced with median.

Validation Checks

- Attendance must be between 0–100.
- Post-Test Score must be between 0–100.
- Student_ID should remain unique.

Derived Metrics

- Improvement Percentage calculated from Pre-Test and Post-Test Scores.
- Attendance Bins created for outcome analysis.

These measures improve reliability and consistency of dashboard KPIs.

3. What's the right cadence — real-time, weekly, or monthly?

Answer

Different stakeholders require different reporting frequencies.

Stakeholder	Cadence	Purpose
Field Workers	Daily/Weekly	Monitor attendance and data collection
Program Managers	Weekly	Track program performance and outcomes

Executive Director	Weekly	Review outcome achievement and cost efficiency
Donors & Board Members	Monthly/Quarterly	Assess impact and funding effectiveness

Suggested Action

If completion rate or outcome achievement rate declines, investigate attendance patterns, program delivery quality, and beneficiary engagement.
